

# Slurry Sample Divider

## ACCURATE SEPARATION FOR VARIOUS USES – SLUDGE/ LIQUID DIVIDER

Experience consistent performance with our Sludge/Liquid Divider. Designed for handling difficult materials, it offers reliable and precise division of sludge or liquids.

### KEY FEATURES

- **Adjustable Speed Rotary Table:** Find the ideal operational speed within a range of 0-62rpm, tailored to meet diverse process requirements.
- **Versatile Receiving Dividers:** Our containers come in multiple sizes, ready to accommodate all types of requirements, ensuring precise and convenient collection of samples.
- **Efficient Design:** Any rejected liquid is conveniently collected beneath the rotary table, promoting a cleaner work environment and easier disposal.
- **Durability and Ease:** All components in direct contact with the sludge or liquid are made of stainless steel, providing corrosion resistance, longevity, and straightforward maintenance.
- **Pre-mixing Shakers:** We offer specialized shakers for pre-mixing sedimentary liquids, ensuring optimal consistency before the division process.
- **Safe and Secure:** The system is equipped with an enclosure featuring an interlock safety switch, ensuring operational safety.
- **Mobile and Convenient:** A wheeled cart is provided for easy movement of the slurry divider, promoting enhanced workflow and flexibility.
