

Terminator Over Rotary Sample Splitter

COMBINES CRUSHING AND SPLITTING INTO A SINGLE OPERATION

This machine is a multipurpose unit, seamlessly merging the processes of crushing and splitting into one singular operation. This integration significantly minimizes handling and enables the production of a larger number of samples. The system eliminates the need to worry about human error or incorrectly implemented procedures. It also provides the flexibility to tailor receiving container sizes, quantities, and reject bins or drawers to fit your specific needs.

Moreover, both the feed conveyor and drawer carousel rotation speeds can be meticulously adjusted using the provided variable speed controls. This allows users to make countless fine-tunings to procure the desired sample mass, adding an extra layer of precision and adaptability to the process.

OPTIONAL **ACCESSORIES**

- Dust enclosure designed specifically for the Rotary Splitter.
- Safety switch for enhanced operational safety.
- Interlock safety switch to provide an additional layer of protection.
- Consolidated control panel merging the functionalities of the Combine Terminator Jaw Crusher and Rotary Sample Splitter, resulting in a single unit with a unified voltage requirement.
- Platform specifically designed to facilitate easy loading into the Jaw Crusher.

Terminator Over Rotary Sample Splitter Technical Specifications

WEIGHT :	1854lb (841Kg)
POWER :	<p>3 PHASE / 60Hz 5HP or 7.5HP MOTOR SINGLE PHASE / AND/OR 50Hz MOTORS AVAILABLE PLEASE SPECIFY AT TIME OF ORDERING</p> <p>VOLTAGE OPTIONS: 208, 220, 230, 240, 380, 415, 440, 460, 480, 575, 600</p>
OPTIONS :	ENCLOSURE, VIBRATOR ON HOPPER

DIMENSIONS :

NOTE:
ALL DIMENSIONS ARE
NOMINAL AND ROUNDED
FOR GENERAL REFERENCE
